

4" Round Sealed Regressed Lens

4" Square Sealed Regressed Lens

Kenall's 4" MedMaster™ Sealed Downlight provides a balance of aesthetics with the highest level of protection from plenum-based contaminants in critical environments and conditions. The downlight is appropriate for general lighting, yet is sealed for specialty applications such as patient rooms, nurses' stations, surgical suites, MRI suites and medical offices. It delivers a soothing, low glare light pleasing for any environment.

## 4" Sealed Regressed Downlights

- Small round and square 4" downlights for pleasing aesthetics
- Sealed, easy to clean trims provide infection control, protection and ease of maintenance
- White, white antimicrobial, clear specular and semi specular reflectors with 45° cutoff provide infection and glare control
- High-efficiency LED with regressed diffuse lens provides high lumen performance and homogenous luminance
