New MedMaster & Millenium Flair™ Series

Combining Sleek Design & Customizable Colors with Kenall's Signature Durability

CUSTOMIZABLE COLOR Introducing Kenall's new **Millenium and MedMaster Flair**™ series, where robust durability meets a sleek modern design aesthetic and customizable colors. This innovative fixture offers single- or dual-engine lamping to support color combinations such as static white and static color, dynamic RGB and RGBW, and switchable white/red or white/amber perimeter options. An optional embedded motion sensor is factory preset to 30% dimming with a 20-min timeout. When selected with switchable perimeter and sensing occupancy, the center and perimeter are factory set to white mode. When sensing non-occupancy, the center turns off and the perimeter switches to the selected color (amber or red), based on its intended use: either as a nightlight or for wildlife protection.

UNLIMITED APPLICATIONS Flair is ideal for branding, wayfinding, or providing ambient light in a variety of applications, including parking garages, dormitories, locker rooms, patient guest areas, waiting areas, corridors, restrooms, coastal settings and more. The use of Flair's varied color palette is limitless, such as complementing school, team, or corporate colors, while also enhancing the design aesthetic of the space.

SIGNATURE KENALL QUALITY In addition to its visual appeal, Flair also boasts Kenall's signature high abuse features, including a robust housing, Peace of Mind Guarantee®, IK10 and IP64 ratings, and ADA compliance. An additional NSF2 listing and tunable white option are available for healthcare applications.

With its slim 2" depth, exciting breadth of features, dynamic color palette, and legendary durability, adding a little 'Flair' to your next challenging lighting project just got a whole lot easier.

MedMaster Flair (MFS, MFD Series)

- Delivered lumen range: 927 – 4986 lm*
- Input power: 13 – 67W
- Efficacy: 65 – 87 lm/W
- Edge-lit, diffused center & near-translucent, clear perimeter provides a unique lighting aesthetic
- Optional single- or dual-engine illumination and control
- Surface, wall, or ceiling installation
- 14" or 18" diameter; 2" overall depth
- Static white, static & switchable color perimeter, tunable white, and dynamic RGB/RGBW options

Flair™ Series: Key Product Features

High-Abuse Construction
Suitable for both indoor and outdoor use in the most demanding applications

Visual Appeal
Edge-lit center and perimeter, with the perimeter having a near-translucent, non-illuminated appearance

Flexible Mounting Options
Adaptable solutions for various surfaces and environments; wall or ceiling mount

Two Distinct Light Engines
Single- (Base model) or Dual-light engines to control the center and perimeter light illumination

Versatile Lamp Options
Static white, static or dynamic color, switchable, and RGB (14") & RBGW (18" options)

Available In Two Sizes
14" or 18" diameter; offering a shallow depth and uniform illumination across the lens

Certified to Perform
- NSF rated for cleanability
- IP64 rated
- IK10 impact protection rating per IEC 60068-2-75:1997-08
